

Latihan Unit Testing

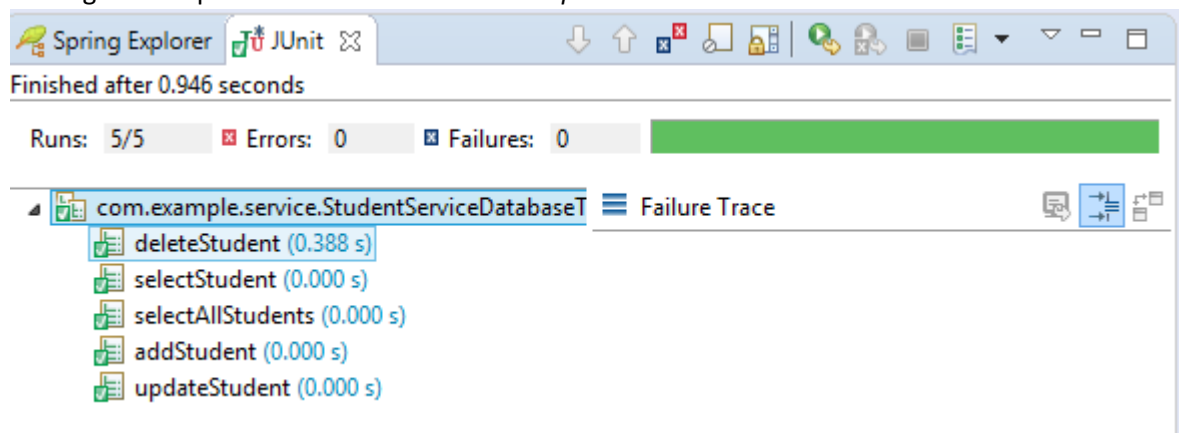

1. Pada *method* **selectAllStudents()** terdapat tiga bagian:
 - Given: Pada bagian ini diinisialisasi *list of object* yang akan dites dan *list of object* yang akan jadi *parameter* pengecekannya. Masing-masing *list of object* menampung *object StudentModel*. Pada `BDDMockito.given()` akan melakukan manipulasi terhadap *function* yang akan dipanggil dengan *return value* sesuai dengan isi dari `willReturn()`.
 - When: Pada bagian ini dilakukan pengetesan dengan *method* yang ingin digunakan yaitu *method* **selectAllStudents()**. Pengetesan dilakukan apakah *method* tersebut akan berjalan dengan memasukkannya pada *list of object* yang baru.
 - Then: Pada bagian ini dilakukan pengecekan terhadap *list of object* baru apakah nilainya tidak *null*, apakah kosong, apakah *size*-nya sama, atau apakah kontennya sama.

Hasil testing:

2. Pada *method* **addStudent()** terdapat tiga bagian:
 - Given: Inisialisasi objek yang akan dites dan objek yang akan jadi parameter pengecekannya. `BDDMockito.given()` akan melakukan manipulasi terhadap *function* yang akan dipanggil dengan *return value* sesuai dengan isi dari `willReturn()`.
 - When: Pengetesan dengan *method* yang ingin digunakan yaitu *method* **addStudent()**. Pengetesan dilakukan apakah *method* tersebut akan berjalan dengan memasukkannya pada objek baru.
 - Then: Pengecekan apakah objek yang dites (objek baru) sama dengan objek yang dijadikan sebagai *parameter* pengecekan.

3. Testing terhadap *method* **delete student** dan **update student**
